

# CASE STUDY:

## Blackstone Golf Club & Restaurant

9700 St. Andrews Dr., Marengo IL

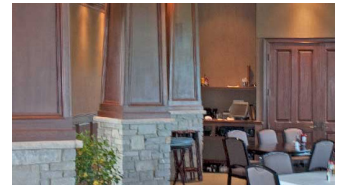

It's a Cinderella story. Outta nowhere. A former greens keeper, now, about to become the Masters Champion.

Scope of Work: Construct an elegantly rustic clubhouse and restaurant overlooking a 4 star, 18-hole golf course surrounded by 26 acres of protected wetlands along with oak and hickory forests.

During construction, Hines Supply coordinated the needs of the owners, architects, interior designers and martial suppliers to ensure the project went smoothly.

The Andersen 400 Series Windows and KML Mahogany Entry Doors maximized the spectacular views while maintaining the aesthetics of the clubhouse.

The Bella Beams, located in the club house and dining room, were installed in only 3.5 days. Projects like this can take 1-2 weeks to fabricate before finishing.

“Mike Krcmar, the Hines Sales Rep, did a great job marshalling this job through. He was there every step of the way and we truly appreciate his responsiveness, worth ethic and professionalism. The Blackstone Golf Club is stunning thanks to the quality of the lumber, millwork, casework, windows and Bella Beams that Hines provided.”
