FULL ACCESS
EDGE

Nest Full Access Edge

At a quick glance, all cabinets look pretty much the same. We invite you to take a closer look. Compare Nest Home Cabinetry full-access construction to typical face-frame cabinetry and see the value.

NEST FULL ACCESS CABINET	TYPICAL FRAMED CABINET
FULL ACCESS  <p>A full-access, or frameless, cabinet has no frame attached to the face of the cabinet. Doors visually cover the entire face of the cabinet (true full overlay) and attach to the inside of the cabinet with adjustable, clip-on, concealed hinges.</p>	<p>A frame, often with a vertical piece in the center, is applied to the face of a framed cabinet. It is always visible, in some amount, around the door. Concealed or exposed hinges attach the doors to the frame.</p>
MORE STORAGE SPACE  <p>With no face frames to take up space, our cabinet and drawer interiors are larger. Add <i>full-depth, fully-adjustable</i> shelves and our cabinets provide up to 15% more storage space.</p>	<p>A face frame reduces the depth of the cabinet, and requires narrower drawer boxes, stealing storage space. Many manufacturers offer half-depth shelves with limited adjustability.</p>
SOFT CLOSE DOORS AND DRAWERS  <p>No more slamming doors and drawers. Our standard drawers and doors have state-of-the-art Blum® hardware with soft close action built in.</p>	<p>Soft close drawer glides are commonly available, but typically for an upcharge. Integral soft close door hinges are not always offered, especially without extra cost.</p>
MOISTURE PROTECTION  <p>To protect our cabinets against moisture we cover tops, bottoms and sides, inside and out, with moisture-resistant, thermally-fused melamine. Cabinet end panels are edgebanded on front, back, bottom, and top edges.</p>	<p>Some construction leaves raw materials on the vulnerable backs and bottoms of base cabinets. Some use a covering of paper or vinyl which can peel, or veneer which is not moisture-resistant.</p>
EASY CLEANING  <p>Melamine is easy to clean, moisture- and scratch-resistant, and resistant to bacteria. With no frame, cabinets are easily wiped clean.</p>	<p>Face frames create a lip around the cabinet opening and catch dirt as you try to wipe it away.</p>
CLEAN, MODERN BUILD  <p>Only full access cabinets are built with true full-overlay styling and seamless, flush sides and floors. Our frameless design offers the cleanest, most modern look available and demands tight tolerances with precision alignment.</p>	<p>Framed cabinets offer a "full-overlay" style, but the frame is still visible around the edges of the door. In some cases, you can request flush sides and floors, for an upcharge, but there may still be a seam.</p>
PERFORMANCE CONSTRUCTION  <p>Choose All-Plywood or EPP-Certified Engineered Furniture Core construction. Both are durable and strong. 5/8" -thick, machine-fitted back panels provide structural integrity and make for easier installation. Sturdy, 3/4" -thick shelves use metal shelf clips.</p>	<p>Many lines offer choices of construction materials; some greener than others. Back panels can be 1/4" - or 3/8" -thick, limiting installation screw placement. Still, framed cabinetry can cost more than frameless.</p>

NEST FULL ACCESS CABINET	TYPICAL FRAMED CABINET
DESIGN STYLES  <p>Your Nest full-access kitchen can be traditional, contemporary or anything in between. Choose from Wood, Deluxe Veneer, UltraLux, Thermofoil, Textured Melamine, Eurotek Veneer, Stainless Steel, Aluminum and more.</p>	<p>Framed cabinets are best suited for wood door styles.</p>
STATE-OF-THE-ART DRAWER SYSTEMS  <p>We proudly offer state-of-the-art drawer systems, each with Blum® soft close, full-extension glides: Wood Dovetail Drawers and Pull-outs, Metal Drawers and Pull-outs, and Metal Drawers with Touch-To-Open.</p>	<p>A dovetailed drawer box is very common on framed cabinetry and metal drawer boxes are growing in popularity; however product quality and features can vary greatly.</p>
CUSTOM MODIFICATIONS  <p>More storage, fewer fillers and better design. We'll modify most cabinets, for no charge, up to the next standard-size cabinet. Also at no charge: visible Finished Ends, and Finished Interiors on cabinets that have doors with glass or no doors at all.</p>	<p>Modifications are not allowed with stock cabinet lines, but built-to-order lines often offer modifications for an additional charge.</p>
PREMIUM FURNITURE FINISHES  <p>We provide designer wood stain and paint colors (custom paint colors, too!), glazes and special combinations: Aged, Rubbed, Vintage, Heritage, Worn, Linen and Sangria...at low upcharges. Top-coat with fine-furniture Low Sheen at no charge.</p>	<p>Framed cabinets are mostly available with wood doors, and offered in a nice selection of finishes. Low sheen is a rare, and usually a charged, option found mostly on custom cabinetry.</p>
EARTH GENTLE  <p>We are certified to the KCMA Environmental Stewardship Program and comply with strict CARB II standards.</p>	
AMERICAN MADE  <p>Nest Home Cabinetry is manufactured in Liberty, North Carolina, in the heart of the country's furniture manufacturing industry, from domestically and globally sourced components.</p>	
100-YEAR WARRANTY  <p>We warrant to the original purchaser that our products will be free from manufacturer defects for 100 years from the date of purchase.</p>
