

Case Study Blackstone Golf Club

*It's a Cinderella story. Outta nowhere.
A former greens keeper, now, about to become the Masters champion.*

Project: Blackstone Golf Club & Restaurant
Location: 9700 St. Andrews Dr. - Marengo, IL

Scope of work: Construct an elegantly rustic clubhouse and restaurant overlooking a four star, 18-hole golf course surrounded by 26 acres of protected wetlands along with oak and hickory forests.

During construction, Hines coordinated the needs of the owners, architects, interior designers and material suppliers to ensure the project went smoothly.

The Andersen Series 400 Windows and KML Mahogany Entry Doors maximize the spectacular views while maintaining the aesthetics of the clubhouse.

The Bella Beams, located in the club house and dining room were installed in only 3.5 days. In the past, projects like that took 1-2 weeks to fabricate before finishing!

"Mike Krcmar, the Edward Sales Rep, did a great job marshalling this job through. He was there every step of the way and we truly appreciate his responsiveness, work ethic and professionalism."

The Blackstone Golf Club is stunning thanks to the quality of Lumber, Millwork, Casework, Windows, and Bella Beams that Hines provided."
